

Create a Woodland Collage

It's great fun to make a collage. You can use scraps of paper, fabric, beads, or any materials you like! Get creative and make your own woodland.

You will need:

- A large sheet of white paper
- Blue and green paint
- A paintbrush
- Brown paper
- A pencil
- Scissors
- Glue
- Your choice of paper and fabric scraps, beads and buttons, pictures from old magazines, and dried leaves or twigs

Get Crafty:

1 Paint green grass and a blue sky on the large sheet of paper to create a background for your collage.

2 Crumple up the brown paper so it looks like rough tree bark.

3 Lay your forearm on the brown paper and spread your fingers wide. Your arm and hand are the trunk and branches of a tree.

- 4 Make several trees and glue them to the background.
- 5 Cut out leaves from paper or scraps of fabric. You can use beads or buttons, too. Glue the leaves to the trees' branches.
- 6 Look outside for small dried leaves or twigs to add to your collage. Find pictures of woodland animals online and print them out, cut pictures from old magazines or draw your own animals. Have fun!
