

From a Tiny Acorn to a Mighty Oak Tree

A 100-year-old oak tree

An oak tree may live for hundreds of years.

This is the story of an oak tree's life cycle.

An acorn drops from the tree and grows in the soil.

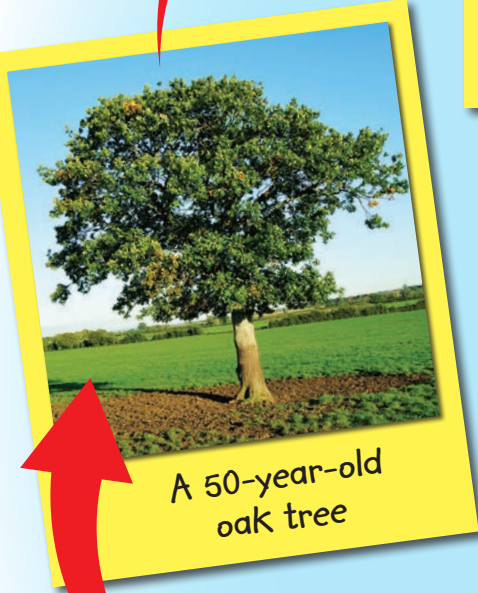

A seedling grows from the acorn.

After one year, the seedling is 0.5 m tall.

A 50-year-old oak tree

Name Date

Look at these pictures from an oak tree's life cycle.

Cut out the pictures and try putting them in order to tell the story of an oak tree's life.

Next, glue the pictures onto the worksheet to make a comic strip story. Write down what is happening in each picture and give your story a title.

Try using these words in your story:

squirrel

autumn

soil

shoot

acorn

spring

trunk

leaves

branches

seedling

buries

sprouts
